The CAN (v. 1) presents a breadth of possible actions to combat malnutrition, with sub-actions classified into three evidence categories, namely: (1) synthesized evidence, (2) primary studies; and (3) practice-based studies. In addition, it identifies factors contributing to an enabling environment for nutrition. The CAN does not prescribe a specific set of nutrition actions. However, it does recognize that prioritization is critical and must be based on context, drawing upon a robust situation analysis, available evidence and country priorities in consultation with a range of stakeholders.

The CAN was developed by the UN Network for SUN/REACH Secretariat, which worked in consultation with FAO, IFAD, UNICEF, WFP and WHO through a participatory process, thanks to a generous contribution from the Government of Canada.
